DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-5 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

In particular, measuring the light power of optical signals of a specific wavelength as received at the photo signal *input* terminal and split by an optical splitter without filtering has not been enabled. The only *disclosed* measurement of a specific wavelength as received at the photo signal input terminal is done so *with* filtering (e.g., see, #51 of figs. 8 and 15 and #61 of fig. 13). It is unclear how one of ordinary skill in the art would separate a specific wavelength from a wavelength-multiplexed signal without filtering. It would seem that separating a specific wavelength from a multitude of wavelength would, in itself, be the very definition of filtering.

Because of the lack of enablement regarding the splitting without filtering, the Examiner is unable to provide an examination over the art.

3. Claims 1-5 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one

skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Please see enablement discussion regarding the filtering above.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

6. Claims 1-5 recites the limitation "said measuring point" in line 7 of claim 1. There is insufficient antecedent basis for this limitation in the claim.
